Summary

Fullstack Engineer with **2+ years of professional experience** delivering scalable web, mobile, and enterprise solutions across financial services and automotive domains. Proficient across the full stack, Angular, React, Flutter, Java Spring, and Python, with a growing specialization in **Agentic AI** and intelligent workflow automation. Holds an **MSc in Computer Science (110/110 cum laude)** with research in AI and quantum NLP. Combines strong technical depth with a systems-thinking mindset to ship high-quality software on time and at scale.

Experience

- BLUE Reply**, Fullstack Engineer – Milan, Italy Feb 2024 – present
- Developed financial services and consumer loans applications using **Angular, Vue.js, Java Spring, and SQL** implemented features following best practices and design patterns; led large-scale framework and component upgrades.
 - Built a cross-platform mobile app in **Flutter** for Android and iOS with fingerprint authentication and geolocation; managed App Store and Play Store releases.
 - Designed an internal **Generative AI** tool using React, Python Flask, and Express.js; boosted engineering productivity through **Agentic AI** automation integrated into CI/CD, development tracking, and task orchestration.
 - Handled AMS for an automotive client ensuring SLA compliance; improved **PHP performance** and led change requests end-to-end.
 - Managed **Git** workflows and Jenkins pipelines; performed effort estimations, solution design, and **microservices interaction architectures** across multiple vendors.

Skills

Languages: TypeScript/JavaScript, HTML/CSS, Java, Python, PHP, C
Frameworks: Angular, React, Vue.js, Next.js, Flutter, Java Spring, Django, Flask, FastAPI, Bootstrap, Tailwind
Databases: MySQL, PostgreSQL, MongoDB, MS Access
Tools: Git, Docker, Jenkins, GitHub Actions, Travis CI, Kafka, Gradle, Maven, Gulp, Jira, Trello, Slack
AI/ML: Agentic AI, LLM Integration, Generative AI, NLP, Prompt Engineering
Concepts: Microservices, REST/SOAP APIs, Async Events, JWT, Agile/Scrum, CI/CD

Projects

- HeartCare** Academic Project
React, Java Spring, MySQL
- Assumed the role of **Project Manager** for a web application project following **Agile/SCRUM** methodology; responsible for Task Scheduling, Risk Management, and HR Management across the full project lifecycle.
- FundMeNow** Academic Project
React, Solidity, Truffle Suite
- Developed an **Ethereum DApp for crowdfunding** using smart contracts and local blockchain.
- QNLP for NFR Classification** Master Thesis
Python, Quantum NLP
- Research study assessing **non-functional requirements classification** capabilities of a quantum NLP model compared with shallow ML models and classical text vectorization techniques.

Education

- MSc** **University of Salerno**, MSc in Computer Science – Software Engineering for IT Sept 2021 – Dec 2023
Management – Salerno, Italy
- **Grade:** 110/110 cum laude
 - **Thesis:** "Exploring the potential of quantum NLP for non-functional requirements classification"
 - **Focus:** Artificial Intelligence & NLP, Software Engineering for AI, Project Management, Software Maintenance and Evolution
- BSc** **University of Salerno**, BSc in Computer Science – Salerno, Italy Sept 2016 – Sept 2020
- **Focus:** Algorithms & Data Structures, Software Engineering, Operating Systems and Networks, Logic and Mathematics
